**To whom it may concern**

Samudrala Snighdha Sreeneha, student of B.Tech Electronics and Computer Engineering, at Vellore Institute of Technology, Chennai, has successfully completed three months internship from Dec 2021 to Feb 2022 in AI/ML at Appcilious Pvt Ltd. Her responsibilities included developing projects in the field of Text, Voice and Image processing.

She is extremely skilled in artificial intelligence and machine learning, and was ready to learn new skills for other projects of the company. She also worked on tasks like creating an API for the trained models. Sreeneha has great problem solving and code debugging skills and many interns reached out to her for solving their errors. Her communication with the co-interns being a senior or a junior intern was commendable.

Sreeneha is a reliable person and is really competent to work with a team. She has capability of being a team leader and has experience needed as an AI/ML Engineer and Data Scientist.

We wish her great success.

Sincerely,

**Arpan Deb**
